## **Afrox warns of potential disruption to industrial gas supply in the Eastern Cape**

At Afrox, we are currently facing electrical supply interruptions at our Coega Development Zone facility, which have impacted our operations since May 3, 2024. We have requested Nelson Mandela Bay Municipality to facilitate the necessary repairs and we hope for a prompt resolution. In the meantime, we have been actively supplying industrial gases from alternative locations to ensure uninterrupted service to our customers in the Eastern Cape.

However, if the electrical supply issues persist it may lead to disruption in the supply of industrial and healthcare gases in the area. We appreciate our customers' patience as we work to resume normal operations.

For further information, please contact the relevant authorities.

Thank you for your understanding.
